

DRS TACTICAL SYSTEMS PARTNERS WITH SOLZON CORPORATION

FOR IMMEDIATE RELEASE

PARSIPPANY, N.J., SEPTEMBER 26, 2011 – DRS Technologies, Inc., a Finmeccanica Company announced that its Tactical Systems Group has partnered with Solzon Corporation, a technology integration consulting firm.

The partnership will enable Solzon Corporation to resell DRS' ARMOR™ X10gx and ARMOR™ X7 rugged tablets to its customers. These rugged mobile computers are specifically designed for mission-critical tasks that require connectivity, mobility, ease of use, and the durability to support all-weather operations.

"We are very happy to partner with Solzon, which is recognized for improving efficiencies through its various technology offerings," comments Mike Sarrica, vice president and general manager for DRS Tactical Systems. "The real-time advanced communications ability of both ARMOR™ rugged tablets will be beneficial to Solzon's customers."

"ARMOR rugged tablets reliably protect data from the potentially harsh conditions that our customers may encounter in the workplace. Having the ability to offer the ARMOR™ X10gx and ARMOR™ X7 will further enable us to help our customers improve worker mobility while reducing costs," said Brian Kolek, President and CTO of Solzon Corporation.

The ARMOR™ X10gx and ARMOR™ X7 are MIL-STD certified for extremes in temperature, vibration, shock, and drops. Both feature a range of connectivity options that go beyond WWAN, including Bluetooth® wireless, integrated GPS, Gobi™ mobile broadband, and 802.11 a/g/n WiFi.

With a weight of just 4.7 lbs. and a 10.4" sunlight-readable touch screen display, the ARMOR™ X10gx carries an ingress protection (IP) rating of 67, which means it is fully protected against dust and can withstand the effects of immersion in water to depths up to three feet (or one meter). Other features include a new docking system, an Intel® Core2 Duo™ Processor with up to 4GB RAM, an Intel® embedded Montevina system architecture, and a 64GB solid-state hard drive with options up to 160GB that is user-replaceable.

The ARMOR™ X7 compact rugged tablet offers hand-held mobility at a weight of 2.85 lbs., with a 7" sunlight-readable touch screen display. Like the ARMOR™ X10gx, it has the durability to support all-weather operations with an IP65 rating. It features the Intel® Atom™ processor N450 and runs Microsoft® Windows 7 Professional. The ARMOR™ X7 also marks the debut of the new m-SATA solid state drives from Intel in the rugged marketplace, in both 40GB and 80GB capacities.

About ARMOR™

ARMOR™ rugged tablet computers from DRS Technologies combine real-time advanced computing and communications technology with MIL-STD durability and reliability. Based on more than 25 years of experience developing military computer systems and industrial tablets for the harshest real-life working conditions and environments, ARMOR™ fully rugged tablets are certified to survive the harmful effects of dust, sand, glare, moisture, impact, temperature extremes, vibration, and more. They enhance the productivity of mobile workers in field service, heavy industry, energy, manufacturing, construction, transportation, public safety, homeland security, and the military, among other industries.
