**PRESS RELEASE**

## DRS Technologies Adds X10mg Tablet PC to its ARMOR Product Line

PARSIPPANY, N.J., (July 1, 2010) – ARMOR Rugged Mobile Solutions, from DRS Technologies, has taken another step in revolutionizing the large mobile tablet category with the introduction of the ARMOR X10mg rugged tablet computer. Designed to maximize viewability and mobile connectivity the ARMOR X10mg boasts industry-leading display technology and light-weight construction, all in an incredibly durable package.

The ARMOR X10mg delivers amazing outdoor readability with an all-new exclusive bonded transfective, energy efficient 10.4" LCD display. This new technology utilizes external light, allowing the backlight to turn down, thus extending battery life. To reduce weight and maintain durability, the ARMOR X10mg is made of an all-new magnesium alloy. This lightweight chassis is equipped with ShutOut™ technology, providing IP 66 certified protection without the need for encumbering I/O flaps.

Additionally, the ARMOR X10mg offers hot-swappable, no-tool battery access. Inside, the user-replaceable 2.5" hard drive, integrated Wi-Fi, Bluetooth, and optional GPS provide data protection and connectivity. Meanwhile, the internal OEM FlexSpace™ and protected Type III PCMCIA slot offer customization for any application. Manufactured and certified to MIL-STD-810F standards, the ARMOR X10mg is tested for drop-shock, moisture, dust, vibration resistance, temperature and other extreme conditions.

The ARMOR X10mg is the ideal solution for workforces that need the best in protection, efficiency and portability.

### **About ARMOR and DRS Technologies**

The ARMOR brand is based on over 25 years of experience developing computer and display systems that survive in the harshest environments. DRS Tactical Systems has both a strong legacy in military computing and, due to its 2005 acquisition of Walkabout Computers, a rich heritage in industrial tablet computing. The combination of legacy and heritage has resulted in a unique competitive advantage that is now available to its partners. For more information on ARMOR, please visit [www.drsARMOR.com](http://www.drsARMOR.com).

DRS Technologies, headquartered in Parsippany, NJ, is a leading supplier of integrated products, services and support to military forces, intelligence agencies and prime contractors worldwide. The company is a wholly owned subsidiary of Finmeccanica S.p.A. (FNC.MI) which employs more than 73,000 people worldwide. For more information about DRS Technologies, please visit the company's website at [www.drs.com](http://www.drs.com).
